

HELP YOUR COMMUNITY BY BECOMING A TECH ANGEL VOLUNTEER!

The Tech to Community Connect project helps people who are digitally excluded by lending them a device and matching them with a trained Tech Angel volunteer. We are recruiting volunteer Tech Angels in this area and we would love to have you on our team!

WHAT SKILLS DO TECH ANGEL VOLUNTEERS NEED?

Tech Angel volunteers need to:

- Be patient, kind and calm.
- Have excellent communication, coaching and mentoring skills.
- Have good digital skills and knowledge.
- Have some free time each week to volunteer.
- Be able and willing to travel to meet their 'match' each week to volunteer.

WHAT OTHER REQUIREMENTS ARE THERE?

- Tech Angels must be willing to have an enhanced Disclosure and Barring Service (DBS) check – we arrange and pay for this for you.
- Tech Angels must be willing to complete an induction and participate in regular training and development sessions.

WHAT WILL I GAIN FROM BECOMING A TECH ANGEL?

- You will become a certified 'Digital Champion' once you complete your induction and training.
- You will gain from all the wellbeing benefits of volunteering, including better mental and physical health.
- You will meet a variety of people in your local community.
- You will have the satisfaction of knowing that you have given the people you help the gift of digital freedom!
